SCIENTIFIC AND RESEARCH ECOLOGICAL CLUB "JASYL QŮRYLYS"

The club's logo

*Motto:*Protect nature – recycle waste!

1. General Provisions

1. Scientific and research ecological club "Jasyl qůrylys" (hereinafter referred to as the club) was organized on 01.09.2022.

1.2 The club was created with the aim of conducting scientific research activities, developing students' knowledge and skills in environmental issues, reducing material consumption, saving fuel and energy resources, intensifying technological processes, and also raising awareness of environmental protection from man-made and household waste.

1.3 The club operates at the School of Architecture and Construction of the East Kazakhstan Technical University named after D. Serikbaev, located at the following address: Ust-Kamenogorsk, Serikbaev Street, 19.

1.4 The club operates in accordance with the legislation of the Republic of Kazakhstan and the internal regulations and normative and methodological documents of the university.

1.5 For students of OP 6B07303 "Production of building materials, products and structures", OP 6B07305 "Construction", research work will be carried out within the framework of the club

1.6 For schoolchildren from city and regional schools and students of other educational programs of the university, scientific research environmental work will be carried out according to an individual schedule.

2. Main tasks and their implementation

2.1 The main objectives of the club are:

- students gain knowledge in the field of ecology and production of building materials using man-made and household raw materials;
- analyze technological processes for their cost-effectiveness and environmental friendliness;
- conduct an analysis of local sources of man-made and household raw materials and link modern technologies for their processing.

2.2 To implement the main objectives, the club has the rights:

- conduct environmental research work and projects;
- to involve university students, pupils from city and regional schools in the events held.

3 Main areas of activity:

- Involvement of all students in research activities in accordance with their identified scientific interests.
- Teaching students to work with scientific literature, developing a culture of scientific research;
- Preparation and publication of students' research results.

4 Principles of the club's activities:

- voluntariness;
- scientific nature
- functionality
- responsibility

5 Club Membership:

- membership in the club is voluntary;
- Any student of VKTU, students of city and regional schools can become members of the club;
- Membership in the club is free of charge.

6. Rights and the duties of the members of the research club:

Club members have the right to:

- participate in the activities of the club, including the programs and events it implements, and make suggestions for improving the work of the club;
